Different solutions for different applications

From villas to multi-family units

Villas

Small building

Building complex

Different types of constructions
mean different types of offer

EASYKIT - BASIC KITS

for standard level villas

Closed solution that provides **BASIC FUNCTIONS**, normally for simple systems:

- one or two family homes
- ready made solutions
- expandable solutions
- plug-in or DIN power supply

PROFESSIONAL KITS

for high level villas

Initial basic solution that **CAN DEVELOP** into a **MORE COMPLEX** and **CUSTOMISED** systems:

- one or two-family homes
- ready made solutions
- fully expandables
- enhanced functions

2 WIRES SYSTEM

for small buildings

The best technology when **TIME SAVING** and **EASE** of **INSTALLATION** are required:

- small buildings/homes
- easy and quick to install
- maximum versatility
- perfect for refurbishments

IP SYSTEM

for building complex

The system conceived for **BIG RESIDENTIAL BUILDINGS** where IP cabling is required.

- larger buildings and complexes
- high performances
- long distances and high number of apartments
- integrated security functions

EASYKIT

Main features:

- Easy, simple and quick installation
- SMART Wifi connected solution for your security
- 2 non-polarized wires for an error-proof connection
- Practical and functional: hands-free solutions enabling dialogue while moving freely
- High-resistant, waterproof metal entrance panels
- One family installation. Easy switch to two families by adding the additional internal unit
- Expandability with additional internal units, entrance panel and CCTV camera.

EASYKIT

"very simple" solutions

Hands-free video kits comprising:

- a wall-mounting metal entrance panel (rainshield included) equipped with a colour camera and a LED lamp for the illumination of the field of view.
- a video colour display internal unit (plug-in power supply included).

EASYKIT Wifi

Smart solution
for your security

Home + Security

Wifi

Answer the calls,
activate the electrical door locks,
activate the cameras and display
the timeline of the events

Manage up to 20 homes
with your single account

Home + Security

Incoming call

Receive notification
when someone
is calling

See who's calling

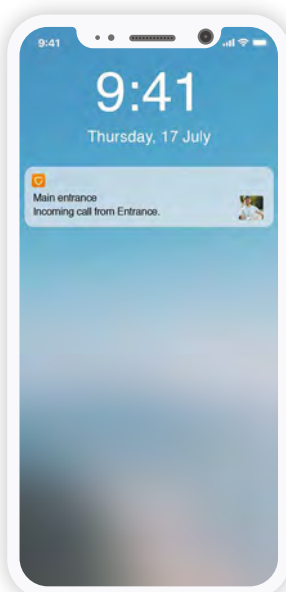

Answer the call and
open the gate for
the courier

Check the events

Check who called you
and if they left you
a message

Quick actions

- Activate the electrical door locks
- Activate the timed staircase lights
- Call home / Intercom
- Activate the cameras

Security enhancement with integration of Netatmo devices

Video door entry system and security. Together.

Video door entry system

Main entrance

Incoming entrance call.

Security

Secondary entrance and interiors

Smart Outdoor Camera with Siren and movement detection. Smart Indoor Camera with face recognition.

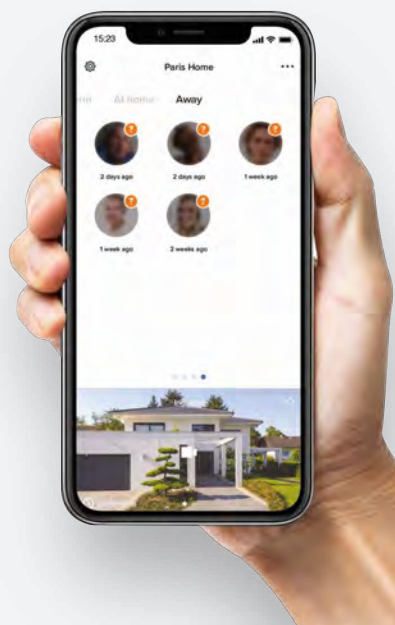

A single App with an intuitive home page. It allows you to answer video door entry calls, activate the door lock and view images from Netatmo smart outdoor and indoor cameras.

Professional opportunity: offer your services as an installer of simple smart security systems.

Business opportunities: access to a catalogue of smart and easy-to-install security devices.

Home + Security
The best App for a safe home.

Solutions for a smart and complete protection of your home: security cameras, alarms, opening sensors, smoke detector...

Leave your home without worries.

ENTRANCE PANEL
durable aluminium finishing

- Practical 2-wires installation
- Weatherproof (IP54)
- Metal protective rainshield
- IK07 degree of protection
- Wide-angle camera (105°)
- LED light and night vision
- Adaptable for one or two-family houses
- Can be connected to a security camera

7" White finish **EASYKIT Wifi with Netatmo**

WITH PLUG-IN POWER SUPPLY

One family two wires colour **EASYKIT Wifi with Netatmo** connected video kit with plug-in power supply and wall mounted entrance panel that can be easily adapted for two family houses. An external CCTV colour camera can be directly connected to the entrance panel. Wifi connected handsfree 7" screen internal unit white finish with European Plug-In power supply included. The system can be expanded up to 3 traditional handsfree internal units. Thanks to the Wifi connection, you can associate the video internal unit to the HOME + SECURITY App (available for Android and iOS).

You can manage by the App the main video internal unit functions (receiving calls, opening the door lock, view the cameras). Through the same App, it is also possible to manage the products of the Netatmo security range (outdoor and indoor cameras, door and window sensors, indoor siren and smoke detector). This allows you to quickly and easily create a Smart security system.

7" Mirror black finish **EASYKIT Plus**

WITH PLUG-IN POWER SUPPLY

One family two wires colour **EASYKIT Plus** video kit with plug-in power supply and wall mounted entrance panel that can be easily adapted for two family houses.

An external CCTV colour camera can be directly connected to the entrance panel. Handsfree 7" screen internal unit black finish mirror effect, with touch control commands for main functions and European Plug-In power supply included. The system can be expanded up to 3 traditional handsfree internal units.

7" White finish **EASYKIT Essential**

WITH PLUG-IN POWER SUPPLY

One family two wires colour **EASYKIT Essential** video kit with plug-in power supply and wall mounted entrance panel that can be easily adapted for two family houses.

An external CCTV colour camera can be directly connected to the entrance panel. Handsfree 7" screen internal unit white finish with touch control commands for main functions and European Plug-In power supply included. The system can be expanded up to 3 traditional handsfree internal units.

Maximum simplicity

The 2-Wires Professional Kits offer unparalleled simplicity and flexibility in installation, making them the perfect choice for both new systems and renovations.

These kits allow for the installation of both audio and video systems using just 2 wires, enabling the use of existing wiring during renovations. Additionally, there is no need to worry about polarity in the connections, which significantly simplifies the installation process.

Item **CLASSE 300EOS with Netatmo – LINEA 3000 connected video kit**

One family handsfree kit with Classe 300EOS with Netatmo handsfree connected video internal unit and LINEA 3000 pushbutton panel in black finish. 2 wires/Wi Fi handsfree connected video internal unit with built in Amazon Alexa voice assistant, 5" vertical touch screen LCD display and video door entry answering machine. It is possible to easily interact with the built in Alexa voice assistant, either using the dedicated capacitive keys or with your voice, and activate several functions, such as the video door entry functions, Smart Home, scenarios, reminders etc. Thanks to the Wi Fi connectivity, you can associate the video internal unit to the Home + Security App (available for Android and iOS). The App allows to use the main video internal unit functions (receiving calls, door lock release, display of the event timeline and activation of the entrance panel/camera cycling). With the Home + Security App, it is also possible to manage the products of the Netatmo security range (outdoor and indoor cameras, door and window sensors, indoor siren, smoke detector). This allows you to quickly and easily create a Smart security system. The device also allows to create and manage MyHOME functions, using the wired SCS BUS solution. LINEA 3000 pushbutton panel with black finish zamak front cover, wide angle colour camera and proximity reader and with a kit of coloured key cards and two clear discs for door lock release. Can be wall or flush installed with specific accessories: (350020) flush mounted box and (343063) flush mounted accessory to be purchased separately. Can be fitted with rainshield (343053) to be purchased separately. The pushbutton panel has a protection index IP54 protection index against mechanical impact IK10.

363915 **Complete one family kit**

(Easy switch to two families system by purchasing an additional internal unit - refer to 2 Wires system internal units range).

HOME + SECURITY is the App that allows, through the smartphone, to manage calls locally and remotely of the video door phone or with a simple touch to open the gate, the activation of the cameras, and switching on of the timed lights in the garden. Allows you to activate and view images of Netatmo Smart Outdoor and Indoor Cameras. Setting up the App requires a few steps and thanks to the BTicino Cloud, the remote connection is fully automated and managed with the highest level of security.

Item Classe 100X16E - LINEA 3000 connected video kit

One-family handsfree kit with: Classe 100X16E with Netatmo Wifi video internal unit, handsfree function, inductive loop, 5" LCD display; LINEA 3000 pushbutton panel with zamak front cover, wide angle colour camera, proximity reader and with a set of coloured key cards and two clear discs for door lock release. Can be configured for one-family and two-family installations. Nameplate lit by white LED. Can be wall or flush installed with specific accessories: (350020) flush mounted box and (343061) flush mounted accessory - to be purchased separately. Can be fitted with rainshield (343051)- to be purchased separately. The pushbutton panel has a protection index IP54- protection index against mechanical impact IK10. The video internal unit has 4.3" colour LCD display and Inductive Loop function (to enable use by people wearing hearing aids fitted with T selector). It also has 3 touch keys for the control of the main functions – door lock release, staircase light control and entrance panel activation/scrolling – there are further 4 configurable touch keys that perform different functions – e.g. staircase light control, intercom, additional door lock activation, generic activations. It has a side lever to adjust: colour, brightness and display contrast, audio volume, call tone volume and Wi-Fi configuration. There are call exclusion notification LEDs and Wifi. Also, thanks to the Wifi connection, you can associate the video internal unit to the Home + Security App (available for Android and iOS). Through the Home + Security App it is also possible to manage the products of Netatmo security offer (Outdoor and Indoor cameras, door and window sensors, internal siren and smoke detector). The installation can be made to the wall using the bracket supplied or using table support accessories (2 x 344692) – to be purchased separately. The device, also equipped with the professional studio (office) function, must be configured.

HOME + SECURITY is the App that allows, through the smartphone, to manage calls locally and remotely of the video door phone or with a simple touch to open the gate, the activation of the cameras, and switching on of the timed lights in the garden. Allows you to activate and view images of Netatmo Smart Outdoor and Indoor Cameras. Setting up the App requires a few steps and thanks to the BTicino Cloud, the remote connection is fully automated and managed with the highest level of security.

Wiring diagram example

2 WIRES SYSTEM

The easiest system offer

The **2 WIRES SYSTEM** is the ideal technology for situations where time-saving and ease of installation are essential. With its non-polarized design, the 2 WIRES SYSTEM allows for seamless installation across a variety of setups, ranging from single villas to apartment complexes.

This technology is particularly suitable, for example, for:

Small and medium size system

THE VILLA

THE APARTMENT

Renovations

The possibility of using existing cables makes it the ideal solution when refurbishing systems.

Remove the old entrance panel being replaced.

Use the two cables already present to connect the new entrance panel.

In addition to the
extreme simplicity,
the system offers

**VERY GOOD
PERFORMANCE**

SYSTEM MAIN FEATURES

3900	Apartments
3900	Apartment video entrance panels
39	Risers with independent sound mode
5	Handsets per apartment
600 m	Distance between entrance panel and farthest internal unit

THE 2 WIRES SYSTEM

offers a wide range of
entrance panels and
internal units, to meet all the
customer needs.

THE SYSTEM

Composition

2 WIRES

A few accessory devices are needed to make the **2-WIRE systems**, as well as the entrance panels and the internal units and/or video internal units.

- Thanks to the use of accessory devices, additional door locks can be **activated and/or lights switched on**.

Audio door entry system

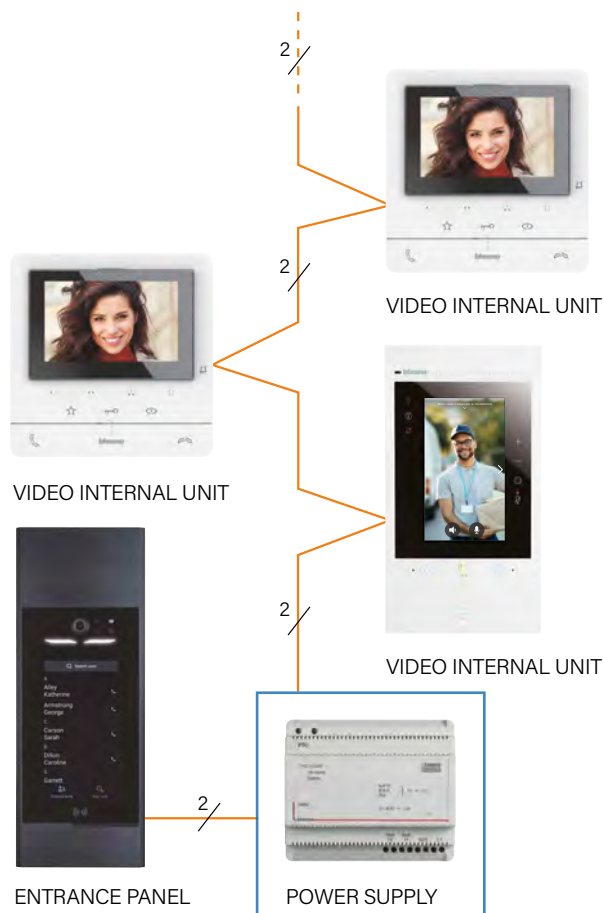

- In apartment-block systems the switchboard can be used for **the management and centralised supervision** of the apartment-block services.

- In systems equipped with Classe 300EOS or Classe 100X16E connected internal units, you can **manage your door entry system calls and functions directly from your smartphone** using the dedicated Home Security App. Additionally, the Classe 300EOS model allows for voice control, enhancing your user experience.

Linea 5000

Digital. Functional. Performing.

**Linea 5000 with Netatmo is the new
BTicino 2 Wires Smart entrance panel.**

Ideal for the “digitalisation” of multi-family settings, it takes access to modern buildings to the next level. Featuring a large 7” touch screen display, a 5 Megapixel wide angle HQ camera, digital filters and a modern and intuitive graphic interface, it integrates perfectly with contemporary buildings, conveying a feeling of innovation and high quality.

Access the building in different ways:

In summary, Linea 5000 with Netatmo is a modern, safe and customisable digital experience, ideal for building access control and suitable for any installation situation.

2 WIRES SYSTEM

Linea 5000

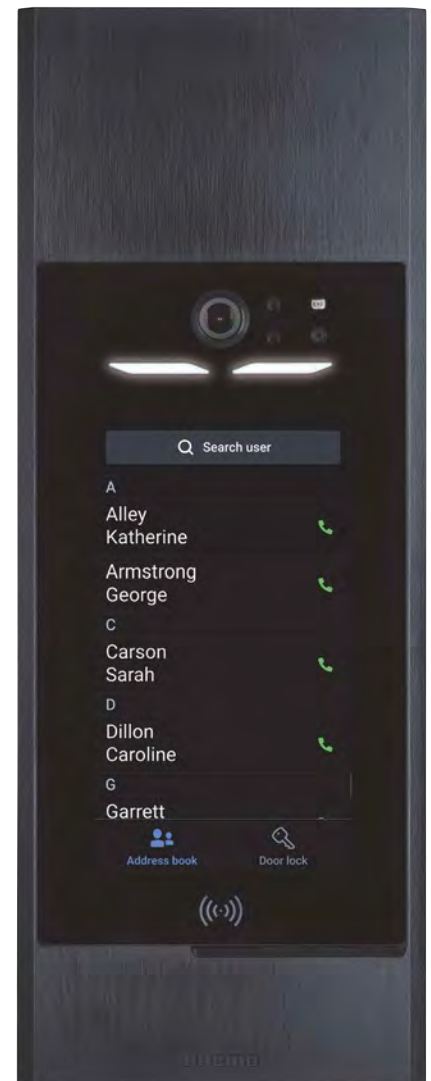

5 exclusive finishes
to add value to every
entrance.

Two finishes in the catalogue.

Aluminium

Nickel

Find the solution for any room.

With 5 exclusive finishes in 60% recycled aluminium Linea 5000 with Netatmo can be easily adapted to all types of buildings, from contemporary of any size to classic architecture. Linea 5000 expresses robustness and high quality in every colour.

Three finishes on demand made to order or project.

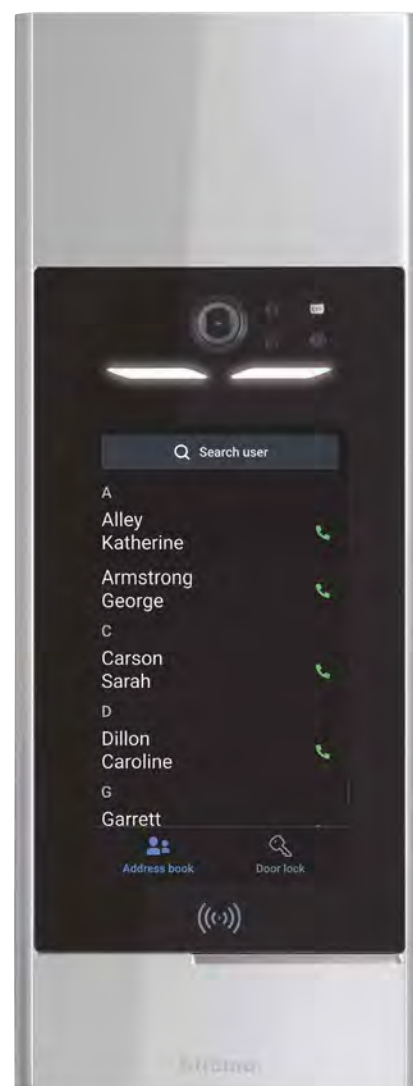

Gold

Titanium

Steel

Linea 5000

BTicino 2 Wires technology.

No changes to your working habits.
Same installation rules as for the 2 wires entrance panels.

Ideal for upgrading existing 2 wires video door entry systems (e.g. systems with Sfera entrance panels or traditional brass pushbutton panels). **Bring your old system to the digital era with the new Linea 5000 with Netatmo.**

Perfectly compatible with all the devices of the BTicino 2 wires video door entry system range: Classe 100 and Classe 300EOS video internal units, power supply units and system accessories.

Wide angle HQ camera

Resolution: 5 Megapixel

Digital filters

Horizontal field of view: (119°)

Vertical field of view: (92°)

NOTE: video signal is transmitted to internal units via PAL encoding on 2-Wires BUS SCS technology.

Linea 5000 is suitable for all home environments.

With 2 wires technology and the possibility of customising the finish with the desired colour, logo and street number, it guarantees maximum adaptability in any living context.

Building

Apartment block

Villa

A sustainable approach

Only active when needed

The proximity and brightness sensors contribute to energy efficiency, as the screen only activates when needed, automatically and only when someone approaches.

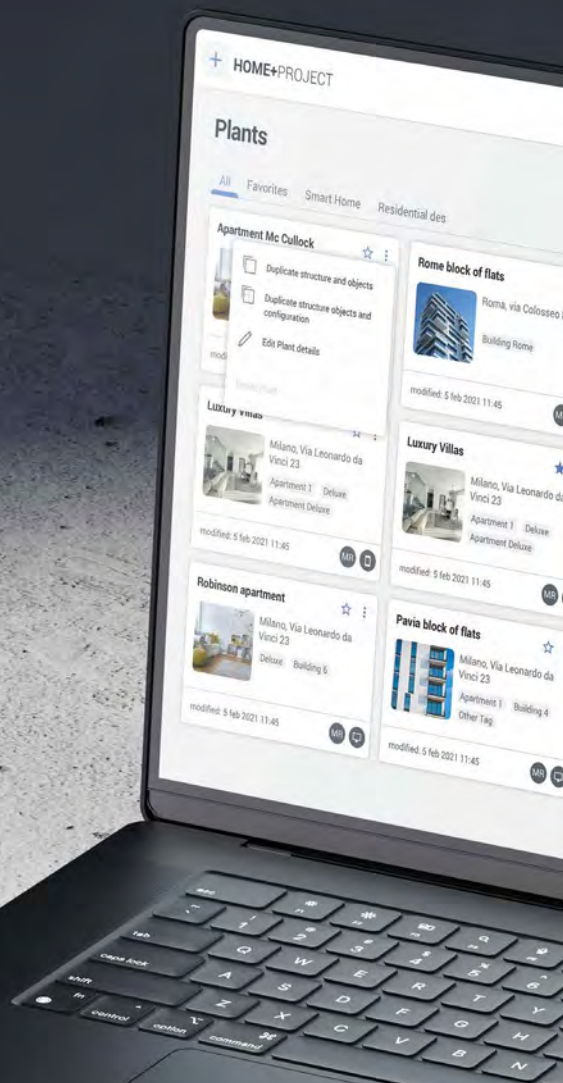

Recycled aluminium

The fixing frames of the Linea 5000 modules and the finishing frames are made of **60% recycled aluminium**.

Linea 5000

Configure your system
with full ease.

HOME + PROJECT. To digitally design, configure and customise the video door entry system

HOME + PROJECT - a new work tool for the installer.

Available as a web app for Desktop PCs

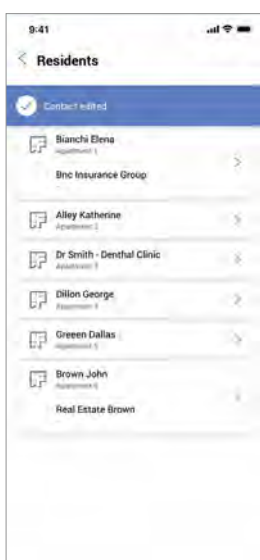

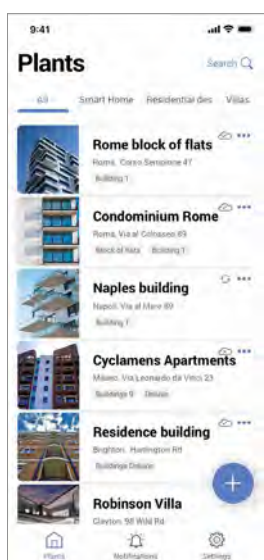

at <https://homeproject.legrand.com> and as a smart device mobile app for on-site configuration.

Thanks to the App, creating, configuring, and fine-tuning the system has never been easier. The Web App for desktop allows you to create and configure the entire system directly from the office, with the convenience of importing files containing entire resident directories.

SMART REPOSITORY

HOME + PROJECT securely stores all your projects, allowing you to easily access your work from anywhere. Forget about searching for codes, local address book directories, and plant information: everything is centralized on H + P. Share your projects with colleagues or administrators quickly and securely, enhancing collaboration and increasing productivity. H + P is the ideal solution to save time and work more efficiently.

REMOTE ADDRESS BOOK EDITING

This digital tool helps simplify not only the configuration process, but also maintenance and customisation. Modify system parameters, update the address book and download the new entrance panel configuration, either remotely or directly on site via Bluetooth connection.

Linea 5000

Total adaptability.

The extensive customisation options, both physical and digital, bring unique freedom of expression. Possibility of customised finishes, with frames in assorted, logo and street number for total adaptability. All this makes Linea 5000 with Netatmo particularly suitable for **meeting the customisation requests from architects, design studios, real estate developers and customers.**

Physical customisation of the finishing frames

Using the specific online tool, it is possible to customise the finishing frames.

Frames for customisation must be ordered using the specific custom part numbers (V/345101-02-03-04-05) - see the relevant catalogue pages.

Digital customisation of the display

It is also possible to customise the display screens by changing the names of the residents in the address book, the display mode, adding a logo / address, as well as displaying messages for visitors/couriers, etc.

White mode: for clear and intuitive use.

Dark mode: protect your eyes and save battery life.

The logo of adds a very personal touch.

Customisable messages for Airbnb guests, couriers and visitors.

Linea 5000

Multiple call modes.
Smart call.

ADDRESS BOOK

with list of residents' names.

CALL WITH CODE (numeric or alphanumeric)

In this mode, in addition to the code you can also choose to have the address book.

APARTMENT BLOCK/RISER/FLOOR/ APARTMENT

Entering the exact address of the apartment to call in the system.

Multiple access modes. Smart access.

NUMERIC CODE

Pre-set.
(maximum of 5 access codes,
also with date/time schedule).

RFID KEYCARD

Pre-programmed / registered.
Keycards available in different colours.

SMARTPHONE

With Home + Security App
via Bluetooth connection.

Linea 5000

Display module installation

The Linea 5000 with Netatmo entrance panels and their add-on modules can be installed flush mounted or surface/wall mounted in different combinations, as shown in the following installation examples.

345000 7" vertical display module with wide-angle HQ camera (5 MP).

Display and audio/video module to be combined with one of the 5 frames in different finishes for the creation of 2 wires systems. Equipped with an HQ camera with wide-angle field of view (119° horizontal - 92° vertical), white LEDs for lighting and twilight sensor for night vision. High-resolution 7" touch screen display with shatter-proof glass (IK08), anti-fingerprint and proximity sensor for automatic switching on.

With a digital microphone and echo eliminator for optimal sound performance. The flexible and user-friendly graphic interface is adaptable to any type of apartment block and allows a choice of 3 different call modes: address book call (list of residents' names), numeric or alphanumeric code call and block-staircase-floor-apartment logic code call.

The direct call to the guard station and the customisation of the homepage logos also make it suitable for solutions with concierge or for commercial establishments.

With advanced features such as voice feedback, automatic theme change (light/dark), customisation of welcome messages or instructions and temporary access code forwarding, it is suitable for residents and visitors of all ages and abilities. It also supports different modes for accessing the building: lock release with display code, RFID badge or Bluetooth via the Home + Security App, the resident's app.

Programming and configuration requires the use of Home + Project (App or PC), the digital tool for the professional. Using this tool, it is possible to complete the entire configuration at the office, share it with other professionals and upload it to the display module via Bluetooth. Changes to residents' names and access codes are quick and smart, either on-site (via Bluetooth) or remotely (if the module has an active WiFi or Ethernet connection). Installation with 3-module flush mounted box 350030 or with wall mounted box 345331 or 345332.

The book-like opening of the module allows for easy wiring. It allows the activation of an electrical door lock directly connected to clamps S+ and S- (18 V 4 A impulsive - 250 mA holding current 30 Ohm max) and of connecting a local door lock release pushbutton on clamps PL.

Item Finishing frames - in the catalogue

345101 3-module frame – Aluminum finish

3-module frame in aluminum finish for display module 345000

345102 3-module frame – Nickel finish

As 345101 but with Nickel finish

Finishing frames - made to order

345103 3-module frame – Gold finish

3-module frame in Gold finish for display module 345000

345104 3-module frame – Titanium finish

As 345103 but with Titanium finish

345105 3-module frame – Steel finish

As 345103 but with Steel finish

Item	Keypad modules
345500	Additional keypad module in Aluminum finish Keypad module with aluminium key finish for door lock opening in 2-wire systems where there is at least one Linea 5000 display module (345000). The keypad module is fitted with relay contacts (C – NO - NC) and clamps (CP - P1) for the connection of a local door release pushbutton and can be programmed using the Home + Project app. It has a programming reset pushbutton, LEDS for the visual notification of the access status and night backlighting. The device, to be completed with an appropriate frame, can be used stand-alone or combined with a display module in a 3+1 composition. To be installed in 1-module flush mounted box 350010, in wall mounted box 345311 or with dedicated accessory 345341 for 3+1 composition.
345510	Additional keypad module in Nickel finish As 345500 but with NICKEL finish
	1-module finishing frames
345201	1-module frame – Aluminum finish 1-module frame in aluminium finish for electronic modules 345500 - 345510 - 345520 - 345530.
345202	1-module frame – Nickel finish As 345201 but with Nickel finish

Item	RFID Smart access module
345520	Additional RFID Smart access module RFID/bluetooth smart access module for door lock opening in 2-wire systems where there is at least one Linea 5000 display module (345000), using the badge or using the Home + Security App via bluetooth. The smart access module is fitted with relay contacts (C – NO - NC) and clamps (CP - P1) for the connection of a local door release pushbutton and can be programmed using the Home + Project app. It has a programming reset pushbutton, LEDS for the visual notification of the access status and night backlighting. The device, to be completed with an appropriate finishing frame, can be installed in 1-module flush mounted box 350010 or in wall mounted box 345311 or 345312.
	Inductive loop module
345530	Additional Inductive loop module Inductive loop module to be used in conjunction with the display module Linea 5000 (345000). It allows people wearing hearing aids fitted with (T) selector to use audio door entry communication. In this mode, the hearing aid receives the audio signal directly from the amplification system, bypassing the microphone of the hearing aid itself, improving audio quality and reducing background noise. It is connected to the display module using the appropriate multicable supplied. To be completed with the appropriate finishing frame (available in 5 finishes) The device CANNOT be used stand-alone but only as additional module in conjunction with the Linea 5000 display (345000). To be installed in 1-module flush mounted box 350010 or with the dedicated accessory 345341 or 345342 for 3+1 composition.

352100

352200

Item	Electronic modules
351000	BASIC speaker module for the creation of 2 WIRES audio systems. Fitted with speaker and microphone volume adjustment. It manages up to 100 pushbutton calls using additional double row pushbuttons. It allows the activation of an electrical door lock directly connected to clamps S+ and S- (18 V 4 A impulsive - 250 mA holding current 30 Ohm max) and of connecting a local door lock release pushbutton on clamps PL. To be completed with surround plate. The device must be physically configured.
351100	speaker module for the creation of 2 WIRES audio systems. Fitted with speaker and microphone volume adjustment. It can manage up to 100 pushbutton calls using the additional double row pushbutton modules. It allows the activation of an electrical door lock directly connected to clamps S+ and S- (18 V 4 A impulsive - 250 mA holding current 30 Ohm max) and of connecting a local door lock release pushbutton on clamps PL. Preset for additional power supply. Fitted with front LEDs for the notification of the operating status: door lock release, active communication, forwarded call, and busy system. Integrated optic sensor for the switching on of the night backlighting. To be completed with surround plate. The device can be configured either physically or using the PC and the specific software. - it can be downloaded free of charge from the website www.homesystems-legrandgroup.com
351500	Sfera audio/video module for the creation of 2 WIRES colour video systems. Fitted with 5 MP wide angle High-Quality camera with digital filters and white LEDs for the lighting of the shooting field. The HQ digital video signal is transmitted to internal units via PAL encoding on 2 Wires BUS SCS technology. Speaker and microphone volume adjustments. It can manage up to 98 pushbutton calls using the additional double row pushbutton modules. Horizontal angle of vision (119°), vertical angle of vision (92°). It allows the activation of an electrical door lock directly connected to clamps S+ and S- (18 V 4 A impulsive - 250 mA holding current 30 Ohm max) and the connection of a local door lock release pushbutton on clamps PL. Preset for additional power supply. Fitted with front LEDs for the notification of the operating status: door lock release, active communication, forwarded call, and busy system. Integrated optic sensor for the switching on of the night backlighting. To be completed with surround plate. The device must be configured physically or using a PC with the specific software, which can be downloaded free of charge from www.homesystems-legrandgroup.com

Item	Electronic modules
352000	additional 4-pushbutton modules arranged on single column. To be used with speaker modules 351000 - 351100 and with video module 351500. Connection using the appropriate multicable supplied. Backlighting of nameplates controlled by the speaker module or the audio/video module connected. To be completed with surround plate.
352100	additional 8-pushbutton modules arranged on double column. To be used with speaker modules 351000 - 351100 and with audio video module 351500. Connection using the appropriate multicable supplied. Backlighting of nameplates controlled by the speaker module or the audio/video module connected. To be completed with surround plate.
352200	nameplate module normally used for displaying the house number or other notifications (e.g. legend for calls using digital pushbutton panels, opening/closing times, etc.). Connection using the appropriate multicable supplied. Night backlighting controlled by the speaker module or the audio/video module connected. To be completed with surround plate.

SFERA

Sfera pushbutton panels - electronic modules

Item	Electronic modules
352500	graphic display module to be used with speaker module 351100 or with audio/video module 351500 (connection using the multicable supplied). It can operate in two modes: call from address book or digital call. The call from the address book gives the possibility of sending the call by scrolling on the display the names associated to the residents. It is possible to store up to 4000 residents names. Using the keypad module item 353000 it is also possible to directly call the apartment by entering the number corresponding to the resident. The digital call is also performed using the keypad module item 353000 by entering the numerical code. It is recommended that one or more nameplate modules, item 352200, are installed at the side of the pushbutton panel to display the correspondence between the numerical codes and the names of the users. It is possible to program the names in the address book in two different ways: manual inclusion using the pushbuttons of the display module or inclusion using a PC with the specific software, which can be downloaded free of charge from www.homesystems-legrandgroup.com , by downloading the file to the display module (RECOMMENDED). System power supply cuts DO NOT cause the loss of memory data. To be completed with finishing front cover.
352700	module for inductive loop and control speech synthesis to be used with speaker module 351100 or with audio video module 351500. It allows use by hearing (equipped with T-selector) or visually impaired individuals, thanks to the synthesis of voice messages on the connection status (call in progress, end of call, no answer, busy, door open). It is connected to the speaker module using the appropriate multicable supplied. To be completed with surround plate. The device can be configured either physically or using the PC and the specific software. - it can be downloaded free of charge from the website www.homesystems-legrandgroup.com
353000	Keypad module for door lock release or for digital call to the apartment (in combination with display module). It's fitted with relay contacts (C – NO - NC) and clamps (CP - P1 - P2) for the connection of a local door release pushbutton. The numerical code for the opening of the door lock can be programmed using the keypad itself, or using a PC after downloading the module programming file. It also has a programming reset pushbutton and LEDS for the visual notification of the access status. Night backlighting with LEDs. To be completed with surround plate. It is connected to the other modules using the appropriate multicable supplied. The device may also be used as a stand alone unit with independent power supply and operation, only for door lock release. Configuration performed using physical configurators, or a PC with the specific software, which can be downloaded free of charge from www.homesystems-legrandgroup.com
353200	RFID key card reader module for the release of the door lock by swiping the key card. It manages up to 20000 key cards. It's fitted with relay contacts (C – NO - NC) and clamps (CP - P1 - P2) for the connection of a local door release pushbutton. The key card for the release of the door lock can be programmed from the module itself, or using a PC after downloading the module programming file. It also has a programming reset pushbutton and LEDS for the visual notification of the access status. Night backlighting with LEDs. To be completed with surround plate. It is connected to the other modules using the appropriate multicable supplied. The device may also be used as a stand alone unit with independent power supply and operation. Configuration performed using physical configurators, or a PC with the specific software, which can be downloaded free of charge from www.homesystems-legrandgroup.com
346993	The key expansion module gives the possibility of connecting the call key to the SFERA speaker modules (items 351000; 351100; 351500). Each module can manage up to 8 call keys. It is possible to connect several key expansion modules (max 96 call keys for each entrance panel)
348200	Door lock release transponder and card for Sfera entrance panels and programmer
348201	door lock release keycard - black
348202	door lock release keycard - red
348203	door lock release keycard - green
348204	door lock release keycard - blue
348205	door lock release keycard - orange
348206	door lock release keycard - grey
3547	door lock release keycard - yellow
348402	door lock release customisable keycard (ISO 50 x 80 mm) tabletop key card programmer

Item	Electronic modules
352500	graphic display module to be used with speaker module 351100 or with audio/video module 351500 (connection using the multicable supplied). It can operate in two modes: call from address book or digital call. The call from the address book gives the possibility of sending the call by scrolling on the display the names associated to the residents. It is possible to store up to 4000 residents names. Using the keypad module item 353000 it is also possible to directly call the apartment by entering the number corresponding to the resident. The digital call is also performed using the keypad module item 353000 by entering the numerical code. It is recommended that one or more nameplate modules, item 352200, are installed at the side of the pushbutton panel to display the correspondence between the numerical codes and the names of the users. It is possible to program the names in the address book in two different ways: manual inclusion using the pushbuttons of the display module or inclusion using a PC with the specific software, which can be downloaded free of charge from www.homesystems-legrandgroup.com , by downloading the file to the display module (RECOMMENDED). System power supply cuts DO NOT cause the loss of memory data. To be completed with finishing front cover.
352700	module for inductive loop and control speech synthesis to be used with speaker module 351100 or with audio video module 351500. It allows use by hearing (equipped with T-selector) or visually impaired individuals, thanks to the synthesis of voice messages on the connection status (call in progress, end of call, no answer, busy, door open). It is connected to the speaker module using the appropriate multicable supplied. To be completed with surround plate. The device can be configured either physically or using the PC and the specific software. - it can be downloaded free of charge from the website www.homesystems-legrandgroup.com

Item	Electronic modules
353000	Keypad module for door lock release or for digital call to the apartment (in combination with display module). It's fitted with relay contacts (C – NO - NC) and clamps (CP - P1 - P2) for the connection of a local door release pushbutton. The numerical code for the opening of the door lock can be programmed using the keypad itself, or using a PC after downloading the module programming file. It also has a programming reset pushbutton and LEDS for the visual notification of the access status. Night backlighting with LEDs. To be completed with surround plate. It is connected to the other modules using the appropriate multicable supplied. The device may also be used as a stand alone unit with independent power supply and operation, only for door lock release. Configuration performed using physical configurators, or a PC with the specific software, which can be downloaded free of charge from www.homesystems-legrandgroup.com
353200	RFID key card reader module for the release of the door lock by swiping the key card. It manages up to 20000 key cards. It's fitted with relay contacts (C – NO - NC) and clamps (CP - P1 - P2) for the connection of a local door release pushbutton. The key card for the release of the door lock can be programmed from the module itself, or using a PC after downloading the module programming file. It also has a programming reset pushbutton and LEDS for the visual notification of the access status. Night backlighting with LEDs. To be completed with surround plate. It is connected to the other modules using the appropriate multicable supplied. The device may also be used as a stand alone unit with independent power supply and operation. Configuration performed using physical configurators, or a PC with the specific software, which can be downloaded free of charge from www.homesystems-legrandgroup.com
346993	The key expansion module gives the possibility of connecting the call key to the SFERA speaker modules (items 351000; 351100; 351500). Each module can manage up to 8 call keys. It is possible to connect several key expansion modules (max 96 call keys for each entrance panel)
	Door lock release transponder and card for Sfera entrance panels and programmer
348200	door lock release keycard - black
348201	door lock release keycard - red
348202	door lock release keycard - green
348203	door lock release keycard - blue
348204	door lock release keycard - orange
348205	door lock release keycard - grey
348206	door lock release keycard - yellow
3547	door lock release customisable keycard (ISO 50 x 80 mm)
348402	tabletop key card programmer

LINEA 3000

LINEA 3000

One entrance
panel for
every need

LINEA 3000 can be configured both for 1 and 2 family house

ONE FAMILY HOUSE

- Write the name on the one family nameplate label (supplied with the product).
- Set the internal micro-switch on position 1.

TWO FAMILY HOUSE

- Replace the nameplate label with the two family one (supplied with the product).
- Write the names on the two family nameplate label
- Set the internal micro-switch on position 2.

LINEA 3000 inside of the professional kits

For **ONE FAMILY** house installation, you have to buy only the kit and all you need is inside it.

For **TWO FAMILY** house installation, you have to buy the kit + an additional 2 wires internal unit. (refer to 2 wires system internal units range).

High installation flexibility

- **LINEA 3000** is sold for wall mounting installation but with the dedicated **accessories** (to be purchased separately), you can use the entrance panel for **flush mounting installation**.

Also available in black version.

Ideal for renovations.....you can reuse the existing flush mounted box.
Same 2 Modules Tersystem and SFERA flush mounting box.

- **LINEA 3000** can be wall mounted with the dedicated **rainshield accessory** (to be purchased separately).

Also available in black version.

THE EVOLUTION OF SMART

Video door
entry system

Management
with smartphone

Voice
control

Smart
Home

Smart
Security

Classe 300EOS with Netatmo is the 2 wires / Wi-Fi handsfree connected video internal unit with built-in Amazon Alexa voice assistant. Using the Home + Security App, in addition to video door entry calls, it is also possible to manage the devices of the Netatmo security range, creating a simple and fast Smart security system.

CLASSE
300EOS | WITH
Netatmo

Change your idea of a video internal unit.

Internal units

Classe 300EOS with Netatmo

The smart vision of the home.

Distinctive design to meet the needs of contemporary living.
Vertical and super slim. With its clean and modern design,
it gives every type of home an innovative look,
and offers a unique user experience.

Vertical display and curved shape:
a disruptive and modern design,
but also understated.

5" Touch Screen

Vertical display
for a better view
of the caller

Face detection

Automatic centring of the
subject on the display

Horizontal display

Double "tap" the display
to view the image
in landscape format

Curved shape

The shape of a welcome:
a "welcoming effect"
for residents and guests.

Item **CLASSE 300EOS with Netatmo connected video internal unit - white finish**

344842

2 wires/Wi-Fi handsfree connected video internal unit white finish with built-in Amazon Alexa voice assistant, 5" vertical touch screen LCD display and video door entry answering machine. Integrated SCS Server for managing MyHOME wired systems. It can be used alternatively to the SCS Server DIN Item MhServer 1. It has a physical key for door lock release and capacitive keys for the control of the main video door entry functions: handsfree communication, entrance panel activation / camera scrolling and Favourite key (can be configured to activate the quick actions most frequently used – e.g. additional door locks, staircase light control, intercom).

There are notification LEDs for:

Wi-Fi network connection status, info / notifications and call exclusion. It is possible to easily interact with the built-in Alexa voice assistant, either using the dedicated capacitive keys or with your voice, and activate several functions, such as the video door entry functions, Smart Home, scenarios, reminders etc. Using the touch display, it is possible to access the notification list, as well as your favourite door entry, security and Smart Home controls (if any). The device must be configured by physically connecting the configurators or using the menu, which will give better possibilities of customisation of associated functions and texts. Thanks to the Wi-Fi connection, you can associate the video internal unit to the Home + Security App (available for Android and iOS). The App allows to use the main video internal unit functions (receiving calls, door lock release, display of the event timeline and activation of the entrance panel/camera cycling). Through the Home + Security App, it is also possible to manage the products of the Netatmo security range (outdoor and indoor cameras, door and window sensors, indoor siren and smoke detector). This allows you to quickly and easily create a Smart security system. Wall mounted installation using the supplied bracket. Possibility of Wi-Fi connection or using RJ45 ethernet cable with the dedicated accessory [344844](#).

Item **CLASSE 300EOS with Netatmo connected video internal unit - black finish**

344884

Same as [344842](#) but in Black finish.

344844

Ethernet accessory

Accessory cable for the wired connection of the Classe 300EOS video internal unit using an RJ45 Ethernet cable. To be purchased separately.

346020

2 DIN additional power supply

Additional 2 DIN power supply to be used to supply the connected CLASSE 300EOS video internal units ([344842](#) - [344884](#)) locally, when required.

Internal units

Classe 100

Classe 100 X16E

Now the standard is connected

BTicino introduces Wi-Fi connectivity to the standard video door entry segment.

BTicino renews the range of **Classe 100** indoor units by introducing Wi-Fi connectivity in the standard video door entry system offer. The result is a range of video and audio indoor units with a modern and elegant design, capable of meeting all installation needs.

Built-in connectivity for constant connection with the home.

22
apt

Up to 22 apartments without dedicated power supply.

Immediate association with the Home + Security App.

Ideal for the refurbishment of old door entry systems.

No extra work for the installer; easier to use for the end user.

After being connected to Classe 100X, the smartphone becomes an "additional virtual video indoor unit" that can be used to answer calls, activate the opening of the door locks and activate the system cameras.

Always aware with the Home + Security App

Home + Security

Netatmo safety devices

NOC - PRO

NOC -S- PRO

NOC-S-WPRO

NSC - PRO

NBU - AS - PRO

DTG - PRO

Item	Smart outdoor camera
NOC-PRO	Smart outdoor safety camera with detection of people, animals and vehicles. Aluminium single monobloc construction. Ultra-resistant glass and plastic, protection against UV rays. Video sensor: 4MP. Resolution: Full HD 1080 p. Coding: H.264. Long-range detection: up to 20 m. Field of view: 100°. 8x digital zoom for videos. Video live microphone. LED spotlight: 12 W, variable intensity. Infrared night vision: 15 m. Encryption protected access to the smartphone using the Home + Security App. Weather resistant: designed for outdoor use (HZO protection).
NOC-S-PRO	Smart outdoor safety camera with detection of people, animals and vehicles. Equipped with 105 db alarm siren. Aluminium single monobloc construction. Ultra-resistant glass and plastic, protection against UV rays. Video sensor: 4MP. Resolution: Full HD 1080 p. Coding: H.264. Long-range detection: up to 20 m. Field of view: 100°. 8x digital zoom for videos. Video live microphone. LED spotlight: 12 W, variable intensity. Infrared night vision: 15 m. Encryption protected access to the smartphone using the Home + Security App. Weather resistant: designed for outdoor use (HZO protection).
NOC-S-WPRO	Features like NOC-S-PRO. White finish.

Item	Smart indoor camera
NSC-PRO	Smart indoor safety camera with people detection consisting of an aluminium monobloc unit. Video sensor: 4MP. 130° panoramic view for a wider coverage. High quality video with Full HD 1080 p viewing. Guaranteed day and night protection with infrared vision, for comfortable viewing even in total darkness. Recording only in case of intrusion, in respect of the privacy of the family. Encryption protected access to the smartphone using the Home + Security App. Declaration of conformity and FCC declarations. Open-source compatibility. It has to be connected to an electric socket with the supplied AC adapter.
NBU-AS-PRO	Smart video security alarm system consisting of 1 smart indoor camera, 1 smart indoor siren and 3 smart door and window opening sensors. The products can be easily configured and associated using the Home + Security app. The smart video alarm system activates and deactivates automatically, has pre-recorded sounds to simulate a presence in the home, respects the privacy of the family and activates a 110 dB sound in case of intrusion.
DTG-PRO	Smart opening sensors for doors and windows ideal for safety. Sensors with waterproof monobloc construction, vibration/motion detection and open/closed status. Power supply with 2 AAA-type batteries included in the package. They only work with the smart indoor camera (sold separately): radio link between the sensors and the camera. Declaration of conformity and FCC. Open-source compatibility. Can be controlled and managed remotely with Home + Security app.

NSA - PRO - EU

NIS - 01 - PRO

NCO - PRO

Item	Smart smoke alarm
NSA-PRO-EU	<p>Smart Smoke Alarm with 85 dB alarm, high performance photoelectric sensor, average coverage 50 m². When it detects the presence of smoke, it activates its 85-decibel alarm and immediately alerts you to your smartphone.</p> <p>It is equipped with a 10-year battery - the maximum lifetime for all smoke detectors. The Self-Test feature checks if the Smart Smoke Alarm is functioning correctly. If it detects a problem, it sends a notification to your smartphone. Reliability guaranteed by CE (EN 14604) and NF certifications.</p> <p>Standalone device, no hub required. Compatible with Apple HomeKit. Operation via the Home + Security app. Requirements: High-speed wireless internet connection needed. Public hotspots not supported. The Smart Smoke Alarm will detect smoke and will sound even if the Wi-Fi isn't configured. However, you will need Wi-Fi to receive smartphone alerts. Wi-Fi 802.11 b/g/n (2.4 GHz), Open/WEP/WPA/ WPA2-Personal, Bluetooth Low Energy (BLE).</p>

Item	Smart indoor siren
NIS-01-PRO	<p>Smart indoor siren with 110 dB alarm, pre-recorded sounds and vibration sensor for tamper detection. Battery power supply or with a cable (not supplied) using the USB micro port.</p> <p>It only works with the smart indoor camera and must be installed in the same room: Bluetooth Low Energy (BLE) wireless connection with the smart indoor camera. Declaration of conformity and FCC declarations. Open-source compatibility.</p> <p>Operation using the Home + Security app.</p>

Item	Smart carbon monoxide alarm
NCO-PRO	<p>Smart carbon monoxide alarm / detector for wall installation. It allows to monitor the fuel-burning appliances (boiler, fireplace, wood-burning stove, gas cooker, etc.) by measuring, in real time, the levels of carbon monoxide, which is an invisible, odourless and potentially fatal gas. When it detects the presence of carbon monoxide, it activates its 85-decibel alarm and immediately alerts you to your smartphone.</p> <p>It is equipped with a 10-year battery - the maximum lifetime for all carbon monoxide detectors.</p> <p>The Self-Test feature checks if the Smart Carbon Monoxide Alarm is functioning correctly.</p> <p>If it detects a problem, it sends a notification to your smartphone. Reliability guaranteed by CE (EN 50291) and NF certifications. Standalone device, no hub required. Compatible with Apple HomeKit.</p> <p>Operation via the Home + Security app. Requirements: High-speed wireless internet connection needed. Public hotspots not supported. The Smart Carbon Monoxide Alarm will detect Carbon Monoxide and will sound even if the Wi-Fi isn't configured. However, you will need Wi-Fi to receive smartphone alerts. Wi-Fi 802.11 b/g/n (2.4 GHz), Open/WEP/WPA/WPA2-Personal, Bluetooth Low Energy (BLE).</p>

2 WIRES SYSTEM

Internal units

SPRINT L2

344242

344232

Item	Sprint L2 audio handsets
344242	2 WIRE audio handset (without the possibility of fitting with accessories) for audio systems and mixed audio / video systems. Wall mounted installation without the need of accessories. With door lock release key and auxiliary functions key (that can be configured). Ringtone volume adjustable on 3 levels. White
344232	As item 344242 but with call to the floor function

Universal analogue audio handset

334262

Item	Universal analogue audio handset
334262	Universal audio handset that can be installed in BTicino analogue (1 + n) and (4 + n) Compatible with most competitors analogue systems. It has a lock release button and it is designed for the installation of 4 buttons accessory (Item 337430) for additional functions. Volume adjustment on 3 levels.

Dimensional data

344232

Size in mm

1 Simple and modern design

2 Ringtone volume, adjustable to 3 levels

3 Two pushbuttons:
- door lock release
- available for applications (e.g. control of staircase lights)

Internal units

Porter switchboards

346310

346300

Item Switchboard and accessories

346310 Switchboard for 2 WIRE audio and video systems. Allows access to various services (video door entry functions, door lock/staircase light management and apartment alarm monitoring) directly from the keypad or via the intuitive icon menu. The switchboard is supplied with an integrated table supporting frame and also features a 7" colour LCD display, receiver and speaker phone, dedicated keys for the main functions and keys which can be configured. The programming can be carried out directly from the device or via PC with TiSwitchBoardDevice software (supplied). The device can manage the phonics of the riser EP (i.e. wired downstream of interface [346851](#)); it cannot however manage the apartment EP (i.e. wired downstream of interface [346850](#)). The use of an additional power supply is recommended. It is possible to connect up to a max. of 16 switchboards (configured from 0 to 15).

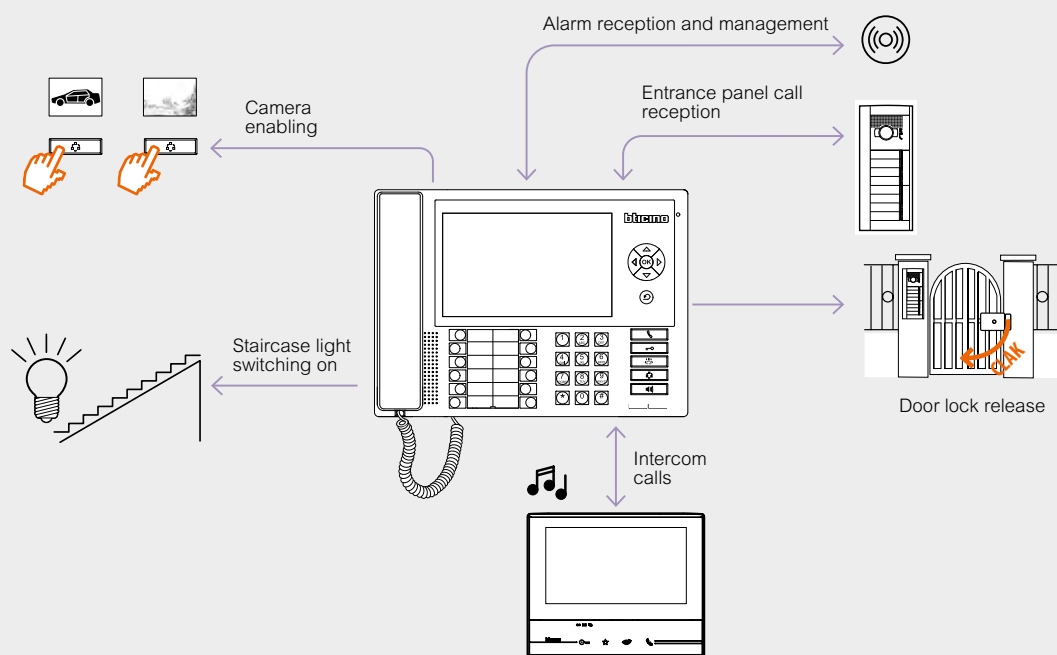

336982 White 8-way socket for table top installation of switchboard item [346310](#)

336803 8 – Way cable with connector for the table top installation connection.

Item SOFTSWITCHBOARD software

346300 Switchboard software for the management of audio and video door entry system calls. The software (Windows operating system compatible) can be installed on any desktop or laptop PC, and gives the possibility of receiving, managing and transferring the calls from the entrance panel and the handset. It implements home video monitoring, with cyclical display of the cameras, night and day functions, and the possibility of displaying the alarms in the various apartments.

- Supported operating systems: Microsoft Windows XP Service Pack 2, Windows Vista and Windows 7.
- Software required: NET Framework 3.5 or higher

F441M

Item	Power supplies
346050	Power supply for 2 WIRES system in 6 DIN modular enclosure. Power supply 110 – 240 Vac @ 50 – 60 Hz. The output provides two power supplies in very low safety voltage (one on the 3 TK BUS, IU BUS and SCS clamps, one on the 1 - 2 clamp) to be used alternately and NOT at the same time. To be used in audio, video or mixed audio video systems. The video adapter is integrated in the device (item 346830 must not be used). It is therefore possible to avoid the use of the A/V node (F441) or the Multi-channel Matrix (F441M), if three junctions (MAX 2 IU + 1 TK risers or 1 IU + MAX 2 TK risers) are not exceeded in total from the clamps. It can also be used as additional power supply (1 - 2 output) for the local power supply of the preset internal units or entrance panels (in this case it is not possible to use other outputs). The device is electronically protected against overload and short circuit. It is a SELV double insulation safety device. The installation must be made in compliance with current regulations. The device must not be configured. WARNING: the (IU BUS), (TK BUS) and (SCS) outputs can be used at the same time respecting the total maximum absorption of 1.2 A. WARNING: Disconnect the power supply for 5 minutes after overload or short circuit.
346040	Power supply for 2 WIRES audio systems in 6 DIN modular enclosure. Power supply 110 – 240 Vac @ 50-60 Hz. The output provides 26 Vdc low rated voltage, and a maximum rated current of 600 mA and it is protected on the PRI side (with fuse) against overload and short circuit. It is a SELV double insulation safety device.
346030	Mini power supply with integrated video adapter to make small 2-WIRES video systems (intercom). 2 DIN modular enclosure. Power supply 230 Vac @ 50-60 Hz. The output provides 27 Vdc continuous low voltage, with maximum current of 600 mA and it is protected on the PRI side (with fuse) against overload and short circuit. It is a SELV double insulation safety device.
346020	Additional power supply to be used to supply the set up entrance panels and internal units locally. 2 DIN modular enclosure. Power supply 230 Vac @ 50-60 Hz. The output provides 27 Vdc continuous low voltage, with maximum current of 600 mA and it is protected on the PRI side (with fuse) against overload and short circuit. It is a SELV double insulation safety device.

Item	Video mixers
F441	Audio video node in 6-DIN modular enclosure set up with 4 input terminals and 4 output terminals. Can connect up to 4 source devices (entrance panels or cameras) in input and up to 4 2-WIRES video risers in output. The device must be used with the system power supply 346000. It must be used as an alternative to the audio video adapter 346830
F441M	Multi-channel matrix in 10 DIN modular enclosure. Set up for the connection of video entry system entrance panels, cameras and sound system sources in input and internal units and amplifiers in output. 4 inputs are dedicated to entrance panels/cameras and 4 to the sound system sources. It can be used to create multi-channel sound systems. The device must be used with the system power supply 346000. In the systems it replaces the video adapter 346830 and the audio video node F441
System interfaces	
346850	Apartment interface in 4 DIN modular enclosure. Can interface a dedicated apartment video door system with local CCTV, sound system and control of the Home automation applications to a 2-WIRES riser. The device must be configured using physical configurators
346851	System expansion interface in 4 DIN modular enclosure. Can double the length of the entrance panel-internal unit line, create risers with independent sound and expand the performance of the apartment system. The device must be configured using physical configurators

Item	Interfaces with other BTicino systems
346891	Can make very large mixed 2 WIRES/IP systems with a large number of devices, thanks to the creation of an IP backbone with 2-WIRES risers. The device must be configured using physical configurators or using the software
346150	8/2-WIRES interface in 6 DIN modular enclosure. Can make mixed video door entry systems (8-WIRES digital backbone/2-WIRES risers). The device must be configured using physical configurators
349410	Analogue/2 WIRES interface in 4 DIN modular enclosure. Can interface a dedicated apartment 2-WIRE video door entry system with cameras and control of the MyHOME applications to an analogue riser, digital 8-WIRES, audio TERSYSTEM and VIDEOPORTER 2000.
DIN actuators	
346210	Relay actuator in 2 DIN modular enclosure. Can switch on lights, open gates, repeat the call on bells (MOD=SLA) or control other devices from the video internal units. The device must be configured using physical configurators
346230	Door lock relay actuator in 2 DIN modular enclosure. Can supply power and activate an electrical door lock. The device must be configured using physical configurators
346260	Timed door lock relay actuator in 4 DIN modular enclosure. Can switch on lights, open gates or manage electro-magnetic door locks, timed door opening and door lock status (with NC contact). The device must be configured using physical configurators

Item	Devices in basic enclosure
346841	Floor shunt with 4 outputs Can make 2-WIRES video door entry systems with star wiring distribution. The device automatically adapts the video signal. Its small size means it can also be placed inside the flush-mounted box
346833	Call to the floor interface. By connecting a traditional pushbutton, the following functions will be possible: general call to the floor, addressed call to the floor, staircase lights on, and door lock release (specific actuator needed) and association of the video image to the call to the floor. The device must be configured using physical configurators
347400	Interface for the conversion of the coaxial signal into a 2 WIRES BUS signal. It can be used to connect to the BUS of the 2 WIRES video door entry system a camera with coaxial video output powered at 12 Vdc, with maximum absorption 150 mA and 1 Vpp video output (75 Ω). The device must be configured using physical configurators
Wiring accessories	
346870	2 WIRES video amplifier. In video systems wired using non-twisted wires, where the distance between the entrance panels and the internal unit exceeds 50 metres, it enables increasing such distance to up to 100 metres
346250	Relay module for gate opening to be used with LINEA 2000, LINEA 3000, MINISFERA and SFERA pushbutton panels. Can open door locks (NOT managed by BUS) by means of the entrance panel
3499	Line terminator. To be used to terminate the riser or apartment line, when the last installed device is not fitted with line closing micro switch
354000	Flat cable for the connection of several SFERA NEW and SFERA ROBUR pushbutton modules. Length 470 mm

346992

336904
336905

3515

3501/1

3501K

Item	Universal speaker unit and expansion module
346991	The universal speaker unit can be used to install the 2 WIRES audio system in new or refurbished systems, where pushbutton panels of other manufacturers are present or required (mail boxes, patterned brass, compact sheet metal units, etc.), preset for a traditional speaker module (e.g. 2659N). The universal speaker unit has, as base, contacts for the connection of 8 call keys; to make systems with more keys (up to 56 using the 346000 power supply and up to 24 with the 346010 power supply one or more key expansion modules must be used (1 every 8 pushbuttons).
346992	Expansion module for connecting more than 8 call keys to item 346991 - max. 6 modules (56 calls max.) with power supply 346000. Max. 2 modules (24 calls max.) with power supply 346010
346994	Universal speaker unit with built-in relay Universal speaker unit with built-in relay (for controlling an electric door lock), designed for the installation of the 2-WIRES audio system in both new and refurbished setups where "special" pushbutton panels are present or required (such as mailboxes, patterned brass, compact sheet metal units, etc.) that are pre-configured for a traditional speaker module (e.g., 2659N). The universal speaker unit includes terminals for connecting up to 4 call pushbuttons and 1 local door release pushbutton. For systems with more than 4 call pushbuttons, it is necessary to add item 346993, with 1 unit required for every 8 pushbuttons (up to a maximum of 100 pushbuttons). The multi-cable with 2 connectors supplied with item 346993 must be used for the connection. Microphone sensitivity and speaker volume can be adjusted using dedicated potentiometers. The microphone of the speaker unit can be detached and placed at a distance of up to 15 cm from the device. In video systems, the device must be paired with cameras featuring coaxial output using interface 347400.

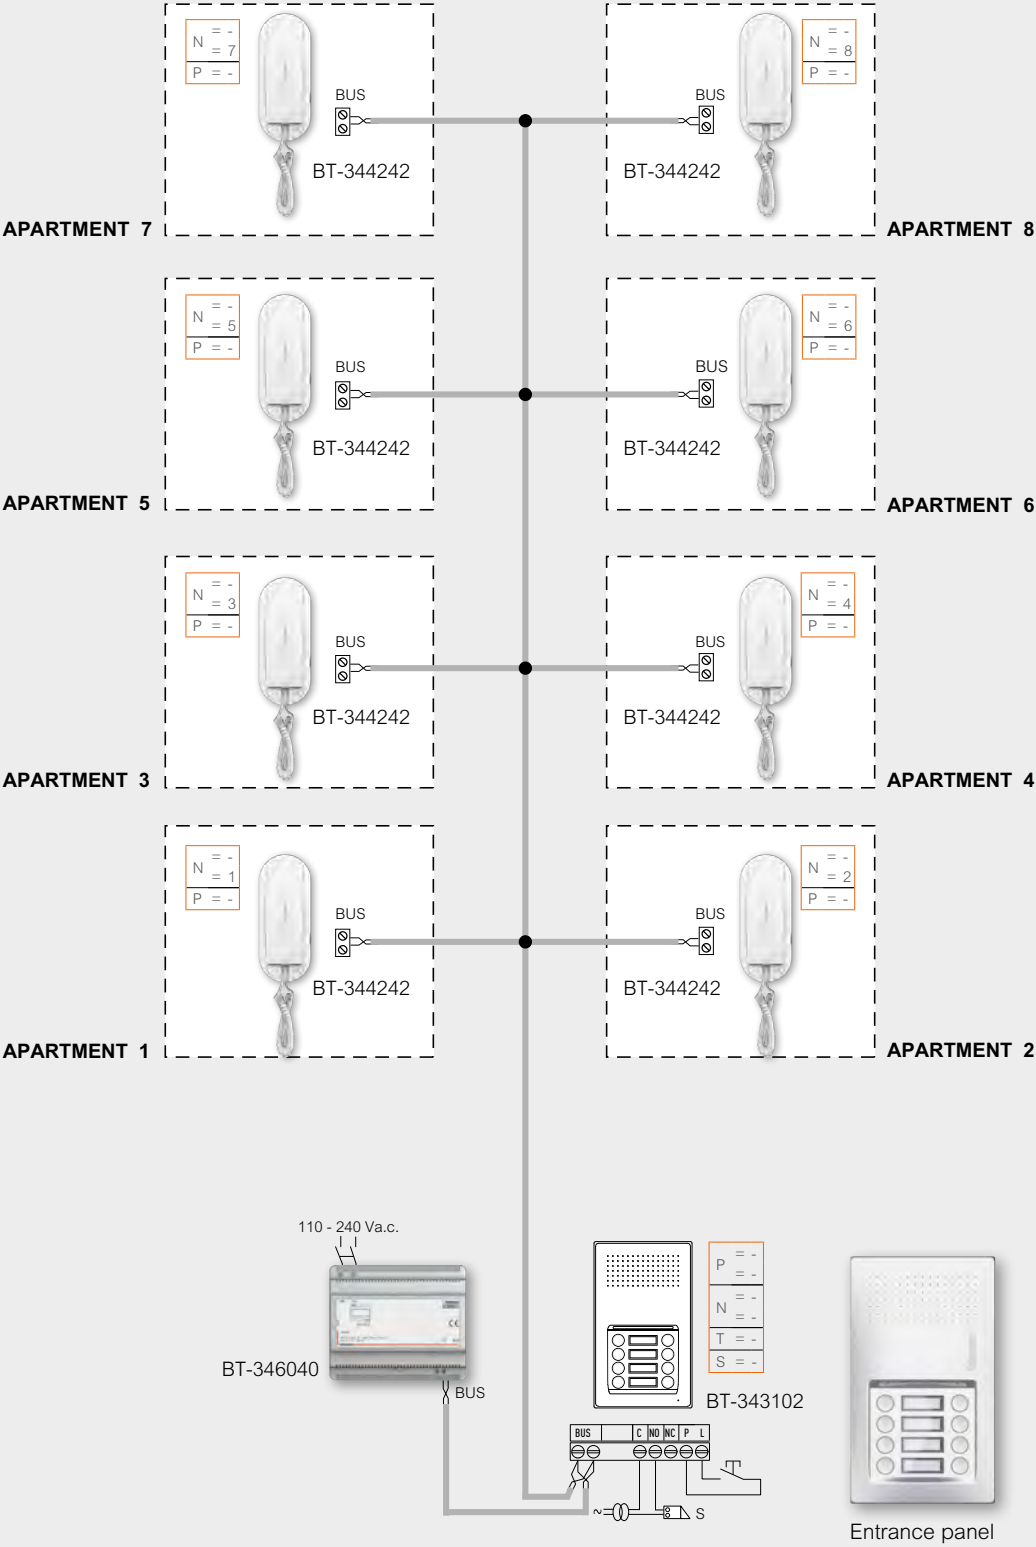

336904	Cable for systems Specific cable for 2 WIRES video door entry applications with 2 twisted conductors. It can be installed in underground piping, in accordance with standards (CEI 20-13 and CEI 20-14). It ensures the best performance in video systems (higher distance between EP and Handset when compared with other cables). 200 m coil
336905	Specific cable for BUS / SCS unshielded, consisting of a white outer sheath and 2 flexible conductors twisted together with a cross section of 0.50 mm ² . Halogen-free low-toxicity cable; ideal for applications in environments where greater regard is required for safety in the event of fire (halogen free). 400 V insulation. Compliant with standards: EN 50575 EN60811, EN50289, EN50290, EN60228, 50265-2-1, EN50395, EN50396. Cable not suitable for burial. Coil length 200 m. Fire reaction class according to CPR regulation: Ccas1b, d1, a1.

3515	Spare part terminal/clamp Spare part terminal/clamp for BUS connection of the predisposed devices

IP SYSTEM

For the best performance

The perfect solution for large residential complexes with a high number of apartments, able to guarantee high performance, long distances and high video signal quality.

Wide range of products with flexible and scalable solutions to satisfy every building needs.

Entrance panel

Video indoor unit

Guard station

red dot winner

The "Red Dot" is a highest design quality award. The international jury only awards this sought-after seal of approval to products of outstanding design.

MAIN PERFORMANCES AND FUNCTIONALITIES

Multichannel: for simultaneous conversations (no busy lines);

High definition video quality: up to 1280 x 720;

Technology: IP protocol (SIP/TCP);

Cables: FTP and UTP (CAT5 - CAT5E - CAT6) - Fiber optic

Configuration: easy and quick configuration with dedicated software;

Integration: Onvif IP Cameras, Lift control, Alarm sensors;

App Home + Security: incoming calls answering and door locks activation by smartphone.

Multiple ways to CALL THE APARTMENT

- 1. STANDARD CALL**
Area-Building-Riser
Floor-Apartment
- 2. ALPHANUMERIC CALL**
Create codes
with numbers and letters
- 3. ADDRESS BOOK**
With contact list
(touch displays only)

ACCESS the building in several ways

FACE RECOGNITION

FINGERPRINT

RFID CARD AND BADGE

ACCESS CODE

SMARTPHONE

Always aware with the Home + Security App

Home + Security

The best App for a safe home

Alerts and notifications for incoming calls, motion and people detection, event information and door lock management with a simple and intuitive interface.

Home + Security
The best App for a safe home.

INCOMING CALL

Receive notification when someone is calling

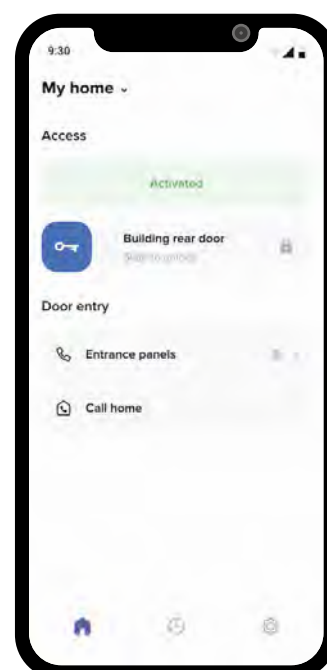

SEE WHO'S CALLING

Answer the call and open the gate for the courier

CHECK THE EVENTS

Check who called you and if they left you a message

QUICK ACTIONS

- Activate the electrical door locks
- Call home
- Activate the cameras
- Manage the answering machine

Integrations

Integrate with ONVIF IP cameras

From the Guard Station it is possible to monitor all the common area IP cameras, while from the indoor units, the resident can monitor private and common area Onvif IP cameras.

Guard station

Indoor unit

Integrate with lift control

Thanks to the access control function, visitors are taken directly to the floor of the called apartment.

NOTE: integration to be performed through Lift Control interface with protocol translator ([375010](#)) or with relays ([375013](#)).

Item	
374003	<p>Video entrance panel with 4.3" display, keypad with numbers and letters (A-I) and badge reader for access control functions. Using the keypad, it is possible to make calls to the apartments and the guard station and enter the access code to release the lock. Configuration of different calling modes:</p> <ul style="list-style-type: none"> - Apartment code (Area - Building - Riser - Floor - Apartment) - Resident's alphanumeric code <p>Enter the settings menu with a specific code for maintenance and for managing the settings (e.g. backlight brightness, ring volume, speaker volume, touch volume, screen saver time). Possibility to upload customized screensavers and advertisements using the configuration software. The entrance panel can be PoE (power over Ethernet) powered, or directly powered using power supply 375005. Flush mounted installation using the dedicated box (B)-375006.</p>
374004	<p>Small video entrance panel for indoor installation with badge reader and key for indoor unit and guard station calls. The small video entrance panel can be PoE (power over Ethernet) powered, or directly powered using power supply 375005. Flush mounted installation using the dedicated box (C)-375008.</p>
374005	<p>Small video entrance panel with 4.3" vertical touch display, face recognition and badge reader for access control functions. From the touch display, it is possible to make calls to the apartments and the guard station and enter the access code to release the lock. Configuration of different calling modes:</p> <ul style="list-style-type: none"> - Apartment code (Area - Building - Riser - Floor - Apartment) - Numeric or alphanumeric codes for residents - Address book with contact list <p>Settings menu for maintenance and for managing settings (e.g. backlight brightness, ring volume, speaker volume, touch volume, screensaver time). Possibility to upload customized screensavers using the configuration software. This device can be PoE (power over Ethernet) powered, or directly powered using power supply 375005. Flush mounted installation using the dedicated box (D)-375009.</p>
374006	<p>Small video entrance panel with RFID badge reader and key for indoor unit and guard station calls. The small video entrance panel can be PoE (power over Ethernet) powered, or directly powered using power supply 375005. Wall mounted installation thanks to the support with rainshield included.</p>

Premium indoor units

373001

373002

373003

373004

Item	Video INDOOR unit
373001	10" touch display premium indoor unit with internal camera and SOS pushbutton. From the touch display, it is possible to answer the call, open the lock, call the other apartments and the guard station, view call and alarm logs, leave audio messages, receive messages from the guard station, adjust the settings (e.g. brightness, screensaver, backgrounds and ringtone) and view date/time information. Alarm management can be easily integrated thanks to 8 pre-arranged dedicated contacts. The integration with the Onvif IP cameras allows to view the IP cameras of the apartment and the common areas from the indoor unit. The specific integration also allows control of the lift. It is possible to associate the video indoor unit to the Home + Security App (available for Android and iOS). The App allows to use functions such as: receiving calls, door lock release, display of the event timeline and activation of the entrance panel. With the Home + Security App, it is also possible to manage the products of the Netatmo Security range (outdoor and indoor cameras, door and window sensors, indoor siren, smoke detector). This allows you to quickly and easily create a Smart security system. The indoor unit can be PoE (power over Ethernet) powered, or directly powered using power supply 375005. Wall mounted using the supplied bracket.
373002	7" touch display premium indoor unit with internal camera and SOS pushbutton. From the touch display, it is possible to answer the call, open the lock, call the other apartments and the guard station, view call and alarm logs, leave audio messages, receive messages from the guard station, adjust the settings (e.g. brightness, screensaver, backgrounds and ringtone) and view date/time information. Alarm management can be easily integrated thanks to 8 pre-arranged dedicated contacts. This allows you to quickly and easily create a Smart security system. The indoor unit can be PoE (power over Ethernet) powered, or directly powered using power supply 375005. Wall mounted using the supplied bracket.
373008	7" PoE powered standard indoor unit, black finish. From the touch display, it is possible to answer the call, open the lock, call the other apartments and the guard station, view call and alarm logs, leave audio messages, receive messages from the guard station, adjust the settings (e.g. brightness and ring tone), and view date/time information. Alarm management can be easily integrated thanks to 8 pre-arranged dedicated contacts. The integration with the Onvif CCTV IP cameras allows to view the IP cameras of the apartment and the common area from the indoor unit. The specific integration also allows control of the lift. It is possible to associate the video indoor unit to the Home + Security App (available for Android and iOS). The App allows to use functions such as: receiving calls, door lock release, display of the event timeline and activation of the entrance panel. With the Home + Security App, it is also possible to manage the products of the Netatmo Security range (outdoor and indoor cameras, door and window sensors, indoor siren, smoke detector). This allows you to quickly and easily create a Smart security system. The indoor unit is 48V PoE (power over Ethernet) powered. Wall mounted using the supplied bracket.

IP SYSTEM

Guard station and accessories

Item	Guard station
375000	Guard station with 10" touch display and handset. From the touch display, it is possible to: answer and transfer calls, view call logs, release the locks, monitor IP cameras installed in common areas, monitor and process alarms. From the setting menu, it is possible to adjust the guard station settings, like volume and display brightness, and carry out functionality and network tests. Quick and scheduled absence can be activated to transfer the call to another guard station or to apartments if needed. The guard station can be PoE (power over Ethernet) powered, or directly powered using power supply 375005.
375001	Accessories Server DES (Door Entry System) including configuration and management software must be installed in the building under the VLAN network of the IP door entry system. The configuration software must be used to create, configure and update the entire installation. The software can be used to create the topology; entrance panels, guard station and indoor units are associated to the corresponding position in an easy and quick way using a scan tool. It also allows the programming of access control tools such as: RFID badges, card, fingerprint and face recognition. The software is also used to: program access control for new residents, view alarm logs, send messages to indoor units, upload advertisements and screensavers and synchronize time/date details on all devices.
375003	Reader for programming card and badges for building access control. Compatible with RFID badges 348200 to ..06 available in different colors. Programming and associating badges to residents requires the use of the configuration software.
375004	Reader for programming fingerprints for building access control. Registering and associating the residents' fingerprints requires the use of the configuration software.

Transponder badge keys		
		Pack
348200	● Black	10
348201	● Red	10
348202	● Green	10
348203	● Blue	10
348204	● Orange	10
348205	● Grey	10
348206	● Yellow	10
3547	Customisable card (ISO 50 x 80 mm)	

Accessories

Item	Accessories
375002	PoE (Power over Ethernet) switch with 10 / 100 Mbps, 8 PoE ports and 1 non-POE port uplink and 24 V-100 W power supply. The PoE port is used for network communication and as power supply. DIN mounted installation (Total of 14 DIN modules).
375005	Power supply 100 W with metal box; can be operate as an auxiliary power supply. Protected against short circuits: in case of DC output short circuit, the device will switch to protected mode. Wall mounted installation.
375006	(B) Metal box for video entrance panel with 4.3" display and keypad, flush mounted installation. Compatible with Cat.No: - 374001 video entrance panel with 4.3" display and keypad, with face recognition and fingerprint - 374003 video entrance panel with 4.3" display and keypad
375007	(A) Metal box for video entrance panel with 10" touch display, flush mounted installation. Compatible with Cat.No: - 374000 video entrance panel with 10" touch display with face recognition and fingerprint - 374002 video entrance panel with 10" touch display
375008	(C) Metal box for small video entrance panel flush mounted installation. Compatible with Cat.No: 374004
375009	(D) Metal box for small video entrance panel with 4.3" vertical touch display, flush mounted installation. Compatible with Cat.No: 374005
375010	Lift control interface with protocol translator to integrate lift function in IP door entry system. The configuration is completed using a dedicate software, the interface is connected via RS 485 cable to the entrance panel and the lift.
375011	USB key to be inserted on DES Server 375001 to enable face registration and to provide access mode for face recognition in the installation. At least one of the following devices must be present in the installation: external pushbutton panel with 10" touch display with face recognition and fingerprint (374000), external pushbutton panel with keyboard, facial recognition and fingerprint (374001) or Small pushbutton panel with 4.3" touch display (374005).
SP111	Plug-in power supply for IP server 375001. Input 100 240 Vac @ 50 60 Hz. Output 19 Vdc. Length of connection cable with IP server = 1200 mm

Item	Accessories
375012	PoE converter for BTicino IP DES devices with 24 V PoE to be installed in standard PoE + network.
375013	Lift control interface with 8 relay to integrate the IP DES with the building elevator system in order to enable the lift call after the resident answer the call and open the gate. The configuration is made directly in IP DES configuration tool included in Server DES 375001.

Note: installation and connections must be always performed accordingly to the elevator type.

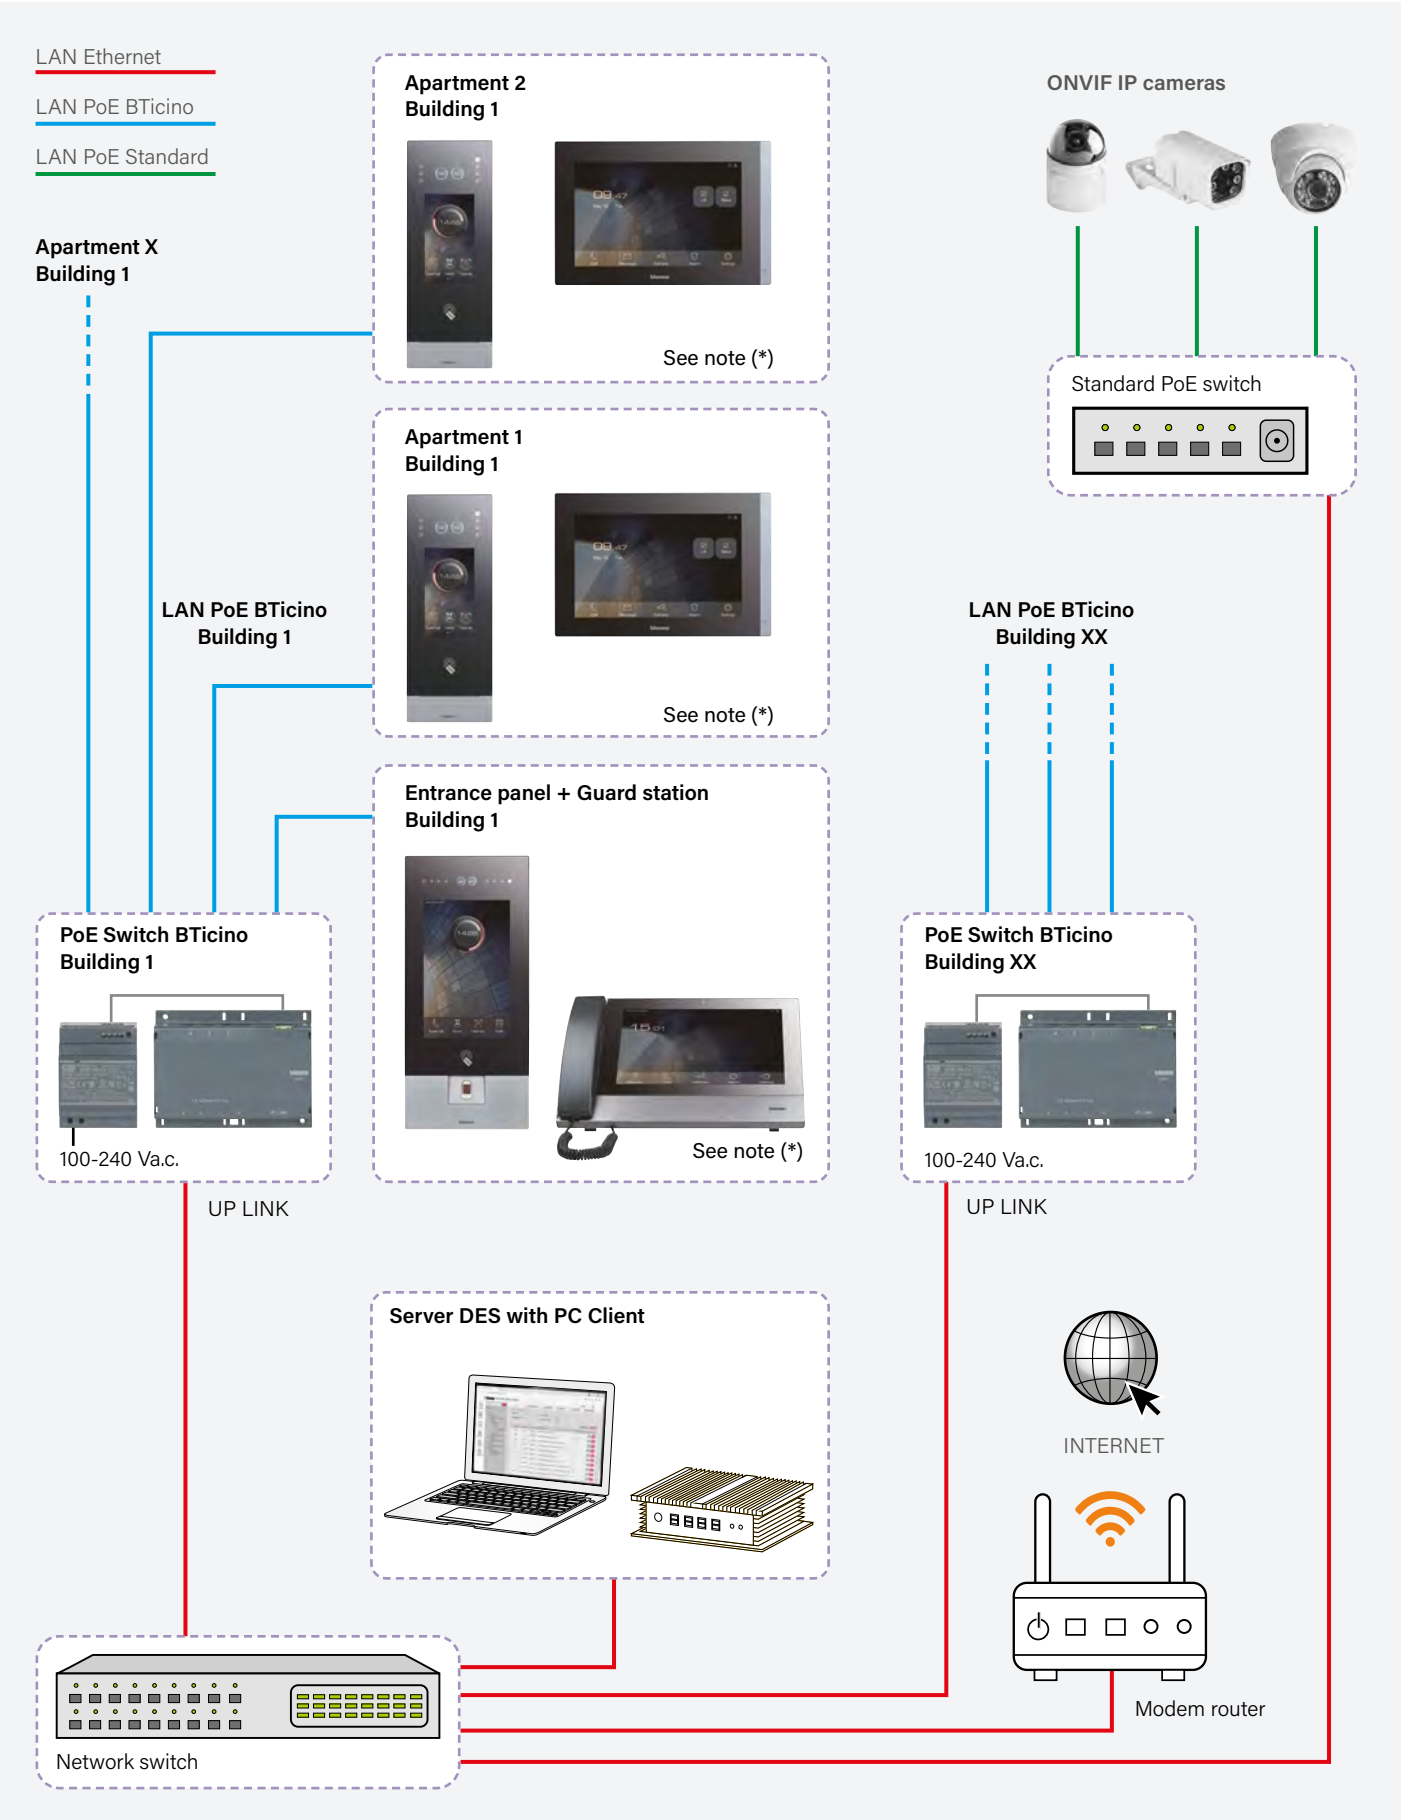

(A) - (B) - (C) - (D) - Correspondence with the specific flush-mounted box - see accessories page.

IP SYSTEM
